Subject: Forced Leasing

Having read the guest opinion in the Idaho Statesman yesterday about the terrible violation that's occurring in Idaho, regarding the forced integration of owners property into compulsory gas drilling, I am writing to express my complete disgust with the bureaucrats and public employees who are allowing the rights of Idaho citizens to be completely ignored! This total disregard for the LAW and the IDAHO CONSTITUTION can not be allowed to go forward. Whether or not the fat cats on the Gas and Oil Conservation Commission have been bought off by the gas/oil industry, this outrage must be stopped. I am unable to attend the next rule-making session on July 22, but hope and expect that you will count this message as this citizen's complete objection to what is being forced on us, by money-grubbing big corporations, whose only objective is to fatten their own bottom line. It is your DUTY to listen to protect the citizens of this state....DO your job and honor those who pay taxes, to pay your salary.
